Made in Italy

MINI PISCINE SPA

Talent System 2.0™

Oggetti del desiderio

Le mini piscine spa di Relax Design® rispondono ai requisiti di comfort, ergonomia e prestazioni ricercati negli ambienti esterni più raffinati o negli interni di lusso di grande quadratura, in cui lo stile minimalista coniuga forma e funzionalità e diviene chiave di lettura dello spazio e dei suoi elementi d'arredo.

Tre modelli, ognuno declinato in diverse dimensioni, dotati di innovative funzioni ed equipaggiati con tecnologia Talent System 2.0 (patent pending):

uno speciale sistema di idromassaggio whirlpool che permette di celare le bocchette di erogazione e la cromoterapia led RGB, integrando le funzioni al guscio interno con bocchette dal design essenziale o - nel caso del modello Time - lasciando il profilo interno completamente libero.

Objects of desire

Relax Design® mini spa pools meet the requirements of comfort, ergonomics and performance sought in the most refined outdoor environments or in large-scale luxury interiors, where the minimalist style combines form and functionality and becomes a key to interpreting space and its furnishing elements.

Three models, each available in different sizes, equipped with innovative functions and with the Talent System 2.0 technology (patent pending):

a special whirlpool system that conceals the jet nozzles and RGB LED chromotherapy, integrating these functions inside the internal shell with essential design nozzles or - in the case of the Time model - leaving the internal profile completely free.

Design ZeTae Studio

ZeTae Studio nasce Napoli nel 2012 ed è lo studio di design del prodotto e d' interni di Ettore Ambrosia e Fabio Chianese.

Guidati dall' idea che i prodotti fissano il tempo di un design in divenire, i progetti dello studio ZeTae si contraddistinguono per il dialogo che instaurano con l'ambiente cui sono destinati e talvolta mostrano apertamente le contaminazioni e le influenze alla base della loro ricerca, sempre contraddistinta da un'elevata attenzione al dettaglio tipicamente sartoriale.

ZeTae Studio was born in Naples in 2012 and it is the product and interior design studio of Ettore Ambrosia and Fabio Chianese.

Guided by the idea that the products set the time of an evolving design, the projects of the ZeTae studio are characterized by the dialogue they establish with the environment for which they are intended, and sometimes openly show the contaminations and influences at the base of their research, always characterized by a high attention to typically sartorial detail.

Molto più di una vasca idromassaggio

Le mini piscine spa sono dotate di alcune funzionalità tipiche di una vasca idromassaggio, ma si differenziano per una serie di caratteristiche:

- sono oggetti studiati per l'installazione outdoor (tuttavia, possono essere installate in ambienti interni che ne consentano il posizionamento)
- ottimizzano il consumo idrico poiché sono dotate di Skimmer, un dispositivo che provvede alla filtrazione dell'acqua
- hanno dimensioni mediamente più grandi e sono dotate di un profilo ergonomico con chaise-longue integrata

Much more than a hot tub

Mini spa pools are equipped with some features typical of a hot tub, but differ in a number of features:

- they are objects designed for outdoor installation (however, they can be installed indoors if the space allows their installation)
- they optimize water consumption since they are equipped with Skimmer, a device that filters the water
- have on average larger dimensions and are equipped with an ergonomic profile with integrated chaise-longue.
